FYI; please let me know if anyone is planning on witnessing this sampling (I'm planning on being there).

Thanks,

Subject: San Jacinto Armored Cap Porewater Field Schedule

Folks – We are on schedule to begin the implementation of the armored cap pore water assessment starting on Tuesday, May 29th. The field crew will meet at the boat launch at the Riverside Inn Marina, 17433 River Road, Channelview, TX 77530 at 7:30 a.m. We will conduct a tailgate safety meeting and review the HASP before launching the boats.

Because we are going to have divers involved in this effort, we will need to limit the number of people on the boat to those directly involved in the installation of the samplers and observers from the University of Texas (UT) that are supporting that effort. The support folks from UT are not 40 hour HAZWOPPER trained, and will not be able to assist other than as an observer from a work exclusion zone on the boat, or shoreline. They are being required to review and sign off the Site HASP and will be involved in all daily safety meetings.

I will also be coordinating with TxDOT to assure we have access into the right-of-way during the sampling for support vehicles. I imagine the total effort for the sampler installation will take a minimum of 3 field days.

Gary – If you, or any other agency folks intend to visit the Site to observe this work, please let

me know who and when as soon as practical so I can take care of the appropriate coordination internally and with TxDOT. I am working on the changes requested in the approved SAP and should have those to you this week.

Phil, Dave and Drew – Please also let me know if any of you will be at the Site. I will be staying at the Springhill Suites in Baytown during field work.

Thanks,
David
